

We Spread the Sacred Message - Reality

Our mission is to spread the importance of reality everywhere, to think about reality, to talk about reality, to allow reality to transform our being. Every time we mention the word Reality we spread the {In:Sacred Message}. We are here to ask the Sacred Question - "What is Real?" We want people to consider reality when making important decisions. By spreading the Sacred Message we cause people to be Real in the {In:Sacred Moment} (which is Now). Our mission is to say "Reality" as many times as we can and to get other people to think about reality as often as we can. We want people to be more realistic in their daily lives and to spend more time every day wondering about what is really real.

The human mind is a biological organ, not a computer. The use of logic and reason is just one of many patterns that the mind can establish. The mind can also establish patterns to believe based on faith and to suppress reason and logic in areas of religious belief.. The act of thinking about reality and wondering what is real reprograms the mind the way exercise reprograms the body. It established new neural pathways and physically transforms your brain. That's why we call Reality the {In:Sacred Message} and to discuss reality is to be {In:Real in the Sacred Moment}.

Thinking about Reality transforms the mind.

We explore reality together as a human race. We are all linked together through the Tree of Knowledge, which is the sum total of all human understanding. Much of what people accept as true has never been sufficiently tested to see if it is real. Much of the world's decisions and social structures are based upon fictional holy books and the commandments of fictional deities that people imagine are directing them. When fiction becomes dominant in society, then society makes bad choices, and those choices affect all of us.

The Church of Reality's world view is that if we as a society are in touch with reality, then we are going to make better choices, and those better choices will lead to a better world. By spreading the word about reality and insisting on making reality - not fiction - dominant in society, we can evolve in the {In:Sacred Direction}, which is forward.

Reality based thinking is the opposite of faith based thinking. Faith is designed to promote fiction by actively suppressing reality.

The word "reality" itself has power. It spreads like a virus. It gets into the mind and it clears out the {In:bullshit}. Reality is the light at the end of the tunnel, leading people away from the Cult Mind. It makes people want to stop living the lie and welcomes them home to the real world. Reality represents freedom of thought and clarity of mind. Reality is a commitment to the truth, to know things the way they really are. Moreover, it's something that we want to share.

Reality is everywhere. You can feel it in your heart. You know reality is real. Reality is in your mind right now. When you breathe in you are taking in real air. Your ears hear the sounds of the real world. When you look into the night sky, you wonder about the vastness of reality. It makes you want to know more about it. Do you want to waste your entire existence believing in fiction or do you want to stop living the lie? Are you ready to make a personal commitment to reality today and to accept reality the way it really is into your life?
