

## Classification of Atheists

Swiped from {In:nw:<http://www.nzarh.org.nz/atheist/auaindex.htm> 'Auckland University Atheists}.

Fundamentalist Atheist: There is no God, and anyone who thinks there is a God is a misguided and dangerous fool.

Evangelical Atheist: It is not sufficient that there is no God. We must do our best to make sure that nobody even believes that there is one.

Theological Atheist: The principles of logic demonstrate the absence of any omnipotent and omniscient being in the universe.

Adolescent Atheist: Since I am a teenager, I know everything, and I know there is no God. The fact that many adults think that there is a God proves my case.

Scientific Atheist: There is no God because I cannot create a falsifiable hypothesis concerning His existence.

Social Atheist: Well, everyone I know and respect is an atheist, so there must be something to it....

Campus Atheist: I need attention, and also to feel important, and I can get these things by being obnoxious about the existence of God.

Politically Correct Atheist: God has a consistent history of discrimination on gender, racial and cultural grounds, therefore must be banned from existing.

Closet Atheist: There are no good reasons for believing in God, but what harm can there be?

Lethargic Atheist: Religion is such a hassle, why bother?

Paranoid Atheist: Religion - sounds like another conspiracy, along with the aliens, the dolphins and the CIA - they're all out to get me!

Nihilistic Atheist: Life has no point, and the existence of a god would invalidate this, so it is obviously not true.

Puritanical Atheist: We shall smite the evil believers in nonsense, and continue our purge until not one theist is left alive...

Philosophical Atheist: I don't believe, therefore I am.
