

A Foundation of Integrity

Integrity is the foundation of the Church of Reality. We are a religion that is built on the rock of truth. As long as we stay true then our religion will be able to stand the test of time and evolve forward. Truth is the rock that makes our religion solid. Other religions are based on fiction. Someone made up a story and people to this day still believe the story. But the fiction isn't based on something that is real so the foundations of other religions move around. Who is to say that one version of fiction is better than another version of fiction? Reality on the other hand isn't going away. No matter what humanity does, reality will still be there. The Earth will still continue to orbit around the Sun for another 4 billion years.

What is amazing about creating doctrine for the Church of Reality is the way it all fits together as it evolves forward. A new idea is discovered and it fits in well with existing doctrine. We add this section on Honesty and nothing that is already here contradicts it. If any rewriting has to be done it's to enhance other principles to make them deeper and more meaningful. Perhaps the fact that everything fits together so well is an indicator that we are on the right track.
