

The Principle of Environmentalism

Environmentalism and Ecology are central to the Church of Reality because it is directly related to our survival and positive evolution. We are all children of {In:Mother Earth} and the {In:Tree of Life}. We are not separate beings that are independent of life around us. We all evolved together and we depend on each other for our food and the air we breathe.

We are one planet. We are all here together. We depend on each other to survive. This is our home and we have to take care of it.

If we poison the air and water with pollution then we have to breathe poison air and drink poison water. The world is not infinitely big and our trash is not going to just go away. Our resources are not unlimited and we have to have a plan to create and maintain a world that we can thrive on until such time as we have the technology to move out to other planets.
