

The Principle of Exploration

The Principle of Exploration is that we choose to be curious. We choose to try to understand. The Church of Reality is not just a static statement of our world view of reality. We choose to actively pursue reality by exploring the universe that we live in. We strive to understand the understanding of understanding. We want to learn as much as we can. We want to know how everything works. We want to know what is really real.

Exploration is part of our {In:religious identity}. We are not "followers", we are {In:Explorers} -- we are on a {In:Quest} to know more. To that end we support education and all the tools of the mind. We consider the Internet to be a holy item to us. We call it the {In:Golden Router} because it provides us a way to store knowledge and communicate what we learn. Exploration expands the {In:Frontier of Knowledge} leading to {In:Positive Evolution}. Through exploration we grow the {In:Tree of Knowledge}.
