Moral Compass Defined

The moral compass is a set of guidelines as to what is right and wrong. It is not an absolute rule. There are always situations where just about anything is justified, but those are the exceptions. The Moral Compass can be compared to the 10 Commandment from Judaism, where the Sacred Principles can be compared to the one principle in the Christian Bible of "do unto others as you would have others do unto you." It is different from the {ln:Sacred Principles} in that it is more about policies and positions on specific issues and behavior rather than the reasons behind those policies.

This is called the Moral Compass because it is intended to point you in a direction by citing examples of what is right and wrong so that in any situation you can figure our the right thing to do. It is also a statement to the world of what we find morally reprehensible, challenging other religions and the non-religious to consider where we stand on right and wrong. This represent in part the moral identity of the Church of Reality.
